

# WELL, WELL, WELL!

It's fun for the entire family

Learn about wells and have some fun with this activity sheet. And if you have a well, make sure you have the water tested every year.

I'm clean now so Jack and Jill can drink me. Good thing their parents test this well every year so it's safe for drops like me!

I'm falling!

Help! I'm surrounded by bacteria in the soil. I must escape!

Look. As I go further down there are fewer bacteria!

Cool. There are no bacteria here.

Hey! That pipe looks like a fun place to explore!

This pipe keeps me safe from bacteria and other nasty things I just travelled through!

This must be a well that will bring me back to the surface.

## WORD SEARCH:

Everyone should drink at least 8 glasses of water every day. Some families get their water from a well. It's really a pipe in the ground that collects and stores water. Since you need safe H<sub>2</sub>O to stay healthy, it is important to have your well tested. A sample of water is drawn from your well and is taken to a laboratory to be checked for contaminants like coliform bacteria or nitrate. This should be done every year, or annually. Some people, like pregnant women, babies and people that are sick, need extra protection. It only costs a small fee to have your water tested. Most of the water in Wisconsin is clean and safe to drink. Make sure you and your family stay healthy by having your well water tested. It's not a lot to pay to quench your thirst and to stay healthy!

Directions: Find the underlined words in this puzzle! (There might be some extra surprises!)
