Project Scope & Description:

Replacement of the current land records system that will better fit the needs of the Portage County Register of Deeds/Land Description office and its users. This system will allow seamless coordination of many current programs within the department and in some cases with state agencies, creating a more efficient county department. This new system will also allow us to archive, integrate, scan and redact required personal information from recorded documents and place those documents on line available to the public. By doing this it will allow us to generate additional revenue. Please note that the money used for the archival project of older documents will be through another funding mechanism, however this software will allow us to seamlessly mesh all information.

Location:

Register of Deeds Office

Analysis of Need:

We are having difficulty (and have been for some time) getting our current software vendor to respond to enhancements, fixes and changes necessary to run a more efficient and productive office. This has caused delays in productivity and in some cases loss of possible revenue. The software is not only failing users within the county but the public that is searching the records as well.

Alternatives:

If we do not replace this system the County will continue to fall behind in integration with state agencies and a greater loss of revenue and staff time.

Ongoing Operation Costs:

The above payment schedule allows for a 5 years period to pay for the software, conversion and installation process during which time no maintenance fee is due. Beginning in 2017 a yearly maintenance fee is required which is approximately \$40,000.

Previous Action:

Funds appropriated in the 2012 budget in the amount of \$76,423.
Funds appropriated in the 2013 budget in the amount of \$35,000.
